920PLUS, 940E和940EV的SOS泡沫工具

## 配件

Lock with keys

Ball-bearing slide for tool carriage with BLOCK system, set of 1 pair

Set of casters

## Safety tips

● Lock all your drawers before trying to roll the tool carriage into a new work area.

● Don't open two or more drawers at the same time, there is high chance of it tipping over.

- Set the brakes on the locking casters after you have rolled the cabinet to your work area.
- Treat your tool carriage, tool chests, or tool boxes with respect.
- Always follow the prescribed max load capacity of individual drawers and the carriage as a whole.
- Always put heavier objects in the bottom drawers
- Always close drawers when not in use.
- Always follow manufacturer manual instructions regarding assembly and repair of your tools.
- Don't throw tools into drawer, always put the tools in.
- Don't use an opened drawer as a working surface.
- Don't clean a lacquered surface with a solvent cleaner.
- Don't pull a tool carriage as you won't be able to see where you are headed. Push it in front of you so you can see where you are going.
- Don't stack a tool carriage with too many extra chests or tool trays; it may tip over at the most unexpected time.
- Don't roll a tool carriage with loose tools or parts on top of the carriage.
- Don't roll a tool carriage too quickly; a pot hole in the floor or some hardware on the floor may cause an accident.
- Don't overload the drawers; if you haven't got room for all of your tools, you need a larger tool carriage.
- Don't open up too many loaded drawers at a time; close each drawer before opening up another. Heavily loaded opened drawers are an invitation to tipping.

## Frequently asked questions

### **What does it mean if the tool carriage has the word BLOCK on the item label?**

This means that it has a system of guides that makes it impossible to have two drawers open at the same time.
