

# Kliješta mehaničarska, kosa, za siguran rad na visini

512/1BI-H

## Profili

---

## Atributi proizvoda

- materijal: Premium Plus ugljični čelik
- kovana, potpuno poboljšana i ojačana
- rezni rubovi induktivno kaljeni
- čeljusti polirane
- završna obrada: kromiranje po standardu ISO 1456:2009
- robusne ručke izolirane dvokomponentnim navlakama
- izrađeno po standardu ISO5745

## Prednosti:

- Kako bi se osigurala najviša razina sigurnosti, metalna kovana zakovica, nije stavljena kroz plastični tulac već kroz osnovni materijal-kliješta
- kovana metalna kopča koja se ne može rastaviti
- na svakom je alatu označena težina alata
- u kopču je moguće učvrstiti dva karabina, što omogućuje sigurnu zamjenu alata
- Alat Unior je prilagođen radu na visini i održava osnovne funkcije alata
- čeljusti zakrivljene pod kutem od 45°

- duge, savijene čeljusti omogućuju jednostavan i precizan prihvat matica i vijaka
- robusne čeljusti kliješta omogućuju dobar prihvat

Barcode	L	A	B	C	D	Weight
626962	170	9	17	61	2,5	156
626192	200	9	17	77	2,5	205

cutting capacity (10N=1kg)

626962	170	1,6	2,0
626192	200	1,8	2,5

\* Slike proizvoda su simbolične. Sve dimenzije su u mm, masa je u g.

## upotreba (pictures)

Pričvrstite karabiner na remenu za vezivanje na kopču alata. Kopče su dovoljno velike da drže 2 karabinera.

Karabiner se mora osigurati od otvaranja zatezanjem matice.

Prije skidanja alata s remena, odvrnite maticu na karabineru.

Otkopčajte karabiner na remenu i uklonite alat pričvršćen za uzicu. Alat je sada spreman za rad.

Na slici je prikazan pravilno pričvršćen alat na remenu za vezivanje s kojim koristimo alat.

Pritisnite iglu u rupu s alatom za rastavljanje nasadnog ključa (stavka 1111), te istovremeno uklonite nasadni ključ sa račne i zamijenite nasadni ključ ili nastavak.

## Safety tips

- Always change tools in secure areas where there is no risk of falling tools.
- Always use tools with Unior carabiners and never use carabiners with a diameter less than 6mm.
- Tools being used at height should regularly be checked for damage and that there is no damage to lanyards, carabiners, attachment rings or belts.

- Don't use tools without attaching them to your work belt when working at height.
- Don't use and fix damaged tools.
- Don't exceed maximum weight of 2.3kg for individual tools that a worker can attach to their belt.

## Frequently asked questions

### **Can we use a tool for working at height as a normal tool?**

A tool for working at height has the same usability as a normal tool, except that a non-removable riveted metal buckle is added to this tool.

### **Does the stated weight per tool for safe work at height also include the weight of the metal ring?**

The weight of the tool marked on the tool, included also weight of metal ring
