

Cable housing cutters

584/4BI-US

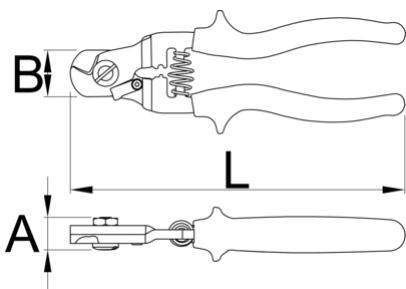

Profiles

Product features

- Pliers developed specially for cutting shift and brake housing. Pliers cut precise and smooth without deformation to the cable housing and feature a built-in crimping function for cable end caps. Locking mechanism keeps pliers closed for easier storage. To unlock the locking mechanism simply squeeze and release the pliers.
- In order to preserve the ultimate cutting performance, we highly advise not to use pliers for cutting shift/brake wires and spokes.
